ROKELY'S

20th Annual Catalogue

PREMIER—The Best General Berry

General Nursery Stock, Gladiolus and Dahlias

J. N. ROKELY & SON
Bridgman, Michigan

AT YOUR SERVICE

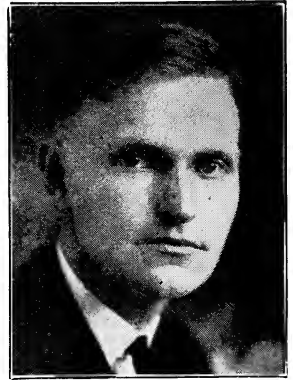

In preparing this, our 20th Annual Catalog, we have striven to improve our list of offerings and our service to our customers and at the same time keep our prices within reach of all. We are sure you will find our prices most reasonable, our service most efficient, and our quality the highest you can buy.

J. N. Rokely

We hope to have the continued patronage of all our old customers and feel confident that our new customers will be highly pleased with the treatment they receive. The name of Rokely has been associated with the growing of fruits and nursery stock here at Bridgman for forty-one years. Why not benefit by this experience?

Nursery Stock Is Scarce

A. J. Rokely

The prolonged drought this past summer did serious damage to young strawberry beds the country over and present indications point to an acute shortage of strawberry plants for the spring planting season. This is also true, in a somewhat lesser degree, of most all kinds of nursery stock and we urge all prospective purchasers of nursery stock to send us their orders just as early as possible so we may reserve the stock before many of our varieties are sold out.

OUR GUARANTEE

We guarantee all nursery stock shipped by us to be strong, healthy, free from disease, full count, and true to name. We guarantee all nursery stock to be freshly dug, properly packed, and promptly shipped. We guarantee that all nursery stock shipped by express or parcel post will reach its destination in good growing condition. Any stock not as we claim will be replaced free of charge, or purchase price will be promptly refunded upon receipt of proper proof. It is mutually agreed, however, that in no case shall we be liable for more than the original purchase price of the stock. ALL COMPLAINTS, except untruthness to name, MUST BE MADE WITHIN FIVE DAYS AFTER RECEIPT OF THE SHIPMENT OR SAME WILL NOT BE GIVEN CONSIDERATION.

We wish it fully understood however, that we do not guarantee continued growth of any nursery stock sold by us. The welfare of plants, trees, shrubs, etc., is entirely dependent upon care, weather conditions, and other matters entirely beyond our control. Our liability, except as above noted, ends upon delivery of good live stock—the rest is up to you.

CUSTOMERS, ATTENTION

SHIPPING SEASON—We begin shipping the last of March or first of April, according to season, and continue until about May 15th. We do not advise our customers to order stock shipped after this date. **We Make Shipments of Strawberry Plants in the Spring only.** Please do not order for late summer or fall shipment as we cannot furnish at that time.

TIME TO ORDER—Early. Make up your order and send to us soon as you receive this catalog. Your stock will then be delivered when you are ready to plant.

TERMS—Cash with order. However, if you prefer, you may send a small down payment with your order and the balance any time before you wish shipment made. Orders amounting to \$5.00 or more will be shipped C. O. D. providing 25 per cent of the amount is remitted with order.

REMIT BY—Personal Check, Express or Postoffice Money Order, Bank Draft, or Registered Letter. Never send currency in letter without registering as we can assume no liability for currency lost in unregistered letters.

REFERENCES—Commercial National Bank & Trust Co., St. Joseph, Mich.; Farmers and Merchants National Bank, Benton Harbor, Michigan; the Postmaster, Express Agent, or any business house in Bridgman.

METHODS OF SHIPPING—For most orders express is the safest and, all things considered, the best way to have your plants shipped. All express orders are shipped charges collect. Many of our small orders are now shipped by Parcel Post and arrive in good shape. We do not recommend it for any but very small orders, however, as it is very expensive on large shipments. All parcel post orders are shipped C. O. D. for postage. In this way, you need send us only the exact cost of the stock in your order and we will then ship it C. O. D. for exact amount of postage required.

PREMIER—The Earliest Good Strawberry

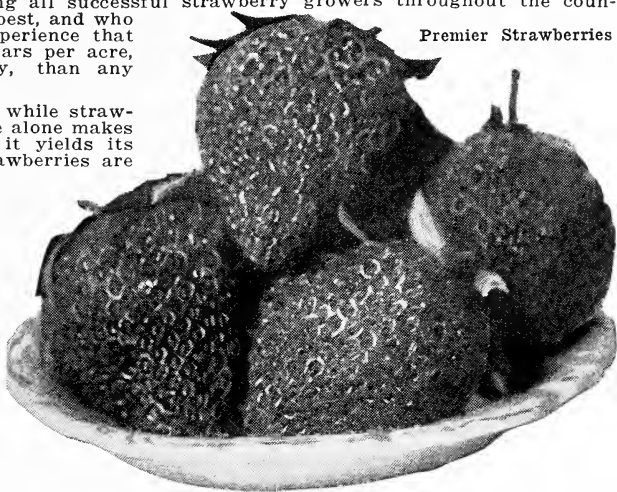

The exceptionally satisfactory and usually profitable crops secured from Premier have made it first choice among all successful strawberry growers throughout the country who know and demand the best, and who have found from their own experience that Premier will produce more dollars per acre, with a bigger crop certainty, than any other variety offered today.

Premier is the earliest worth while strawberry we know of. This feature alone makes it a great money maker, for it yields its fruit crop at a time when strawberries are in great demand, and buyers everywhere are willing and anxious to snap up every available quart of Premier, paying the highest prices for this fancy, early fruit.

The vines bear an enormous crop of large, uniform sized berries, while the berry is bright red clear to the center, is perfect in shape, and ripens without green tips. The fruit presents a very pleasing appearance on the market and possesses a flavor equal to the later varieties, which is very unusual in an early berry. Ripening a week to ten days ahead of

other kinds, it matures the best part of its crop while prices are at the peak which spells profit to the grower. The plants are sturdy, healthy, and long rooted, making them drought resistant. The foliage is a beautiful dark green and very abundant.

Premier Strawberries

RED GOLD—The Sugar Saver

Introduced by Gardner Nursery Company of Iowa, this new early variety is rapidly gaining in popularity. The berries are enormous in size, shining red in color, and the sweetest we have ever tasted. Does not contain the acid found in other kinds so requires much less sugar for preserving. Many report using only one-half the usual amount. A heavy bloomer and sets a large crop of fruit. Plants are healthy and vigor-

ous and make new runners freely, greatly resembling the Senator Dunlap in this respect. Foliage is dark green, leaves round, and fruit stems are strong and erect. We consider this variety especially valuable for the home garden and urge everyone to get a start in it this season. Our stock of Red Gold is quite limited so order early.

(See page 23 for strawberry plant price list).

MIDSEASON VARIETIES

DR. BURRILL

This variety which is known as "The Million Dollar Strawberry" was originated by Dr. Reasoner, of Urbana, Ill., who originated the famous Senator Dunlap. Dr. Burrill is claimed by the originator to be a scientific cross between the Senator Dunlap and Crescent. We have been observing this variety closely for several years and have con-

cluded that the difference between the Dr. Burrill and Senator Dunlap is so slight, if any, that we are safe in calling them one and the same variety. However, we have kept our original strain of Dr. Burrill pure, and can furnish plants from this strain if desired. At any rate, whether you plant Dr. Burrill or Senator Dunlap, you are sure of getting a mighty good berry.

COOPER

After a thorough test in our own fields we can recommend Cooper highly to growers desiring an extra large and showy market berry. This variety makes a wonderfully thrifty growth of foliage, the plants standing erect and presenting a beautiful appearance on account of their great size. The fruit stems, which are protected by the foliage, are very stocky and erect and set an exceptionally heavy crop of berries. The berries are the largest we have ever seen, being two or three times as large as ordinary varieties, and have a rich, luscious flavor all their own. Commence ripening in mid-season bearing an enormous crop of fruit. Berries ripen evenly without green tips.

Red Gold Strawberries

Strawberry prices on page 23.

Senator Dunlap Strawberries

SENATOR DUNLAP "KING OF THE CANNERS"

If you love shortcake, you will appreciate one made with Senator Dunlap, and a can of them during the winter months is a treat unsurpassed in firmness and rich flavor. Both the canning factory and the housewife demand this grand old variety on account of its splendid flavor and dark, rich, beautiful color. Dunlap has been the old standby for years and is still as largely grown as any other one variety. It produces wonderfully large crops of handsome dark red berries of the highest quality. It makes a profuse plant growth, and is so healthy and hardy that it does well in every section of the country. The plants are medium in size, hardy, long rooted, very prolific, and will hold their own under most any rough and tumble methods of cultivation. If allowed to grow unrestricted they will cover the ground with a mat of vines but for best results they should be kept down to a good sized fruiting row.

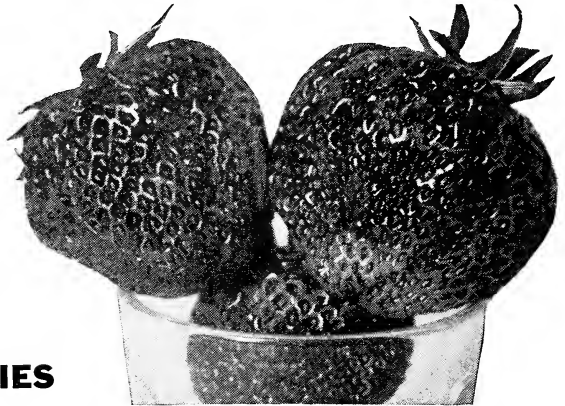

GIBSON

The Gibson berry is a beautiful large red clear to the center, of excellent quality and flavor, firm and will stand shipping as well as any variety we know. The plants yield an enormous crop of fruit, beginning to ripen with the Senator Dunlap and continuing over a long period. Unlike most varieties the Gibson does not become small during the last picking but retain their large size and good quality to the last berry. The plants are long rooted and will

withstand much dry weather. Foliage very rank, affording protection for blossoms and fruit, and is dark green in color. Fruit stems large and strong. Plants propagate freely and will make nice heavy picking rows.

AROMA—Standard Late Variety

Widely grown throughout the country, Aroma is the standard late variety. It is planted in large acreage for late market as it is extra firm and a splendid shipper. It produces a quantity of large berries, uniformly round in shape and deep glossy red in color. The plant is a hardy grower in any climate, producing healthy, dark green foliage. The berry has a pleasing aromatic flavor peculiar to this variety alone. It is a fancy berry and brings top market anywhere. For several years past we have been unable to supply the demand for Aroma but with increased acreage this year we hope to fill all orders. However, better order early and be sure of getting them.

Aroma Strawberries

OTHER LATE VARIETIES

BRANDYWINE

A vigorous perfect blooming plant; tall fruit stalks; broad, heavy, dark green foliage. Plants productive, having four and five stalks heavily loaded with large to very large berries. Medium red, somewhat like Gandy, only a little more dull; large yellow seeds on surface. Flesh red clear through, firm, somewhat acid, but with sprightly flavor; ripens medium to quite late. Does best on heavy loam or heavy clay.

GANDY

A profitable late variety greatly resembling the popular Aroma. It is one of the old standard varieties upon which you can depend. The berries are handsome, very large, well colored, uniform in shape, firm

and a good shipper. Season very late. Plants are healthy, hardy and make a thrifty growth. Does best on heavy soils.

PEARL

Undoubtedly the latest June variety. In the north it does not come into its prime until the very last of June and early July. The fruit is large in size, dark red to the center, firm, and a good shipper. The prominent yellow seeds add to its attractive appearance. Flavor is excellent and is a heavy and sure cropper. When Pearl is at its best the other varieties are off the market so you cannot go wrong in adding Pearl to your list for an extra late berry.

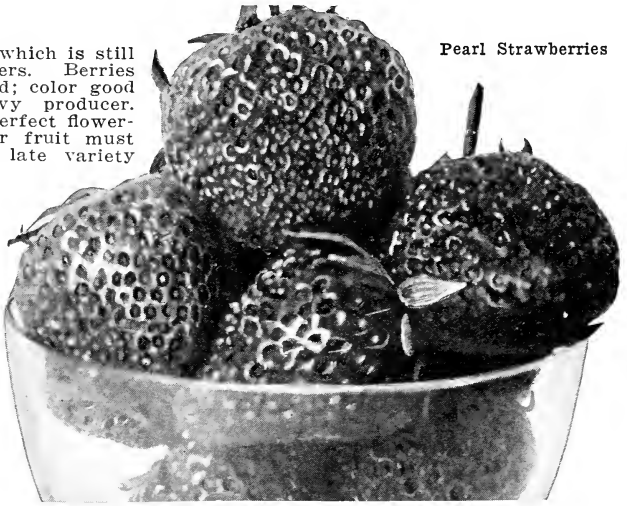

See page 23 for Strawberry Plant price list.

SAMPLE

A good medium late variety which is still a favorite with many growers. Berries large, regular and well flavored; color good and plants thrifty. A heavy producer. However the Sample is an imperfect flowering sort and in order to bear fruit must have some other medium to late variety planted every third row.

WM. BELT

This valuable variety is at its best in the middle and northern states. Berries very large and the first ones to ripen are inclined to the irregular or cox-combed in shape; later berries are uniformly conical. Their excellent flavor combined with their beautiful appearance make them one of our best late varieties and we recommend them highly. Plants are vigorous and thrifty, making just enough runners for a good fruiting row.

Pearl Strawberries

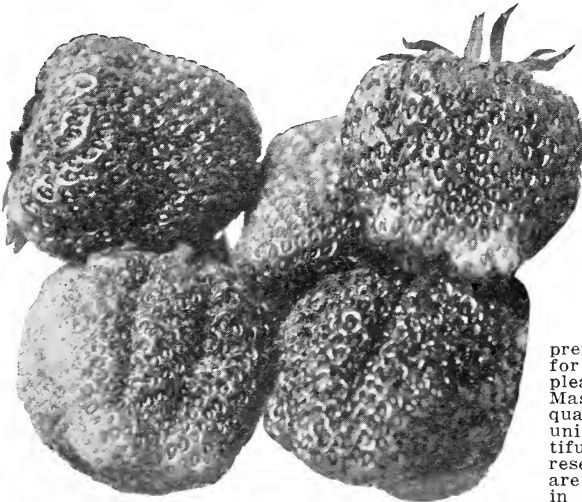

Mastodon—Everbearing Strawberries

THE PERFECT EVERBEARER

Ever since the introduction of the first everbearing varieties, years ago, growers have been waiting for a commercial everbearing strawberry that has size, flavor, productiveness and shipping qualities. The Mastodon has all of these qualities, and more. The plant, unlike other Everbearers, is big, thrifty, with an ideal root system that enables it to produce its enormous crop of fine large berries even under trying conditions. The Mastodon is the largest, and heaviest yielding everbearing strawberry yet introduced.

Mastodon berries are the largest of any known Everbearer. Not just a few, but all the berries, are fully twice the size of the average Everbearer. Neither do they become small during the latter part of the bearing season but retain their large size to the last berries. Berries are glossy red in color and with bright yellow seeds present a beautiful appearance. Flavor is rich and good. More acid than the Champion. The Mastodon plant is large and bushy with a thrifty foliage that protects the berries from hot suns as well as fall frosts. The most prolific plant maker of the Everbearers.

Planted in early spring, the Mastodon begin to ripen its fall crop about July 15th and continues through August, September and October. Not only do they produce a money crop the same summer and fall after planting, but another big crop the following spring with other berries. The Mastodon's spring crop of berries is fully equal in quantity and quality to the regular spring bearing varieties, which is something that can be said of no other Everbearer. Send in your Mastodon order early and avoid disappointment. See page 23 for prices on Mastodon plants.

Mastodon Strawberries

CHAMPION

Until the introduction of the Mastodon, Champion was the leading Everbearer and is still preferred by many of our customers for home use as the flavor is rich and pleasing and much less acid than the Mastodon. The Champion bears large quantities of medium sized berries, uniformly conical in shape, and a beautiful dark red to the center; greatly resembles the Senator Dunlap. They are one of the first berries to ripen in the spring and the fall crop is borne over a long period.

SEE PAGE 23 FOR STRAWBERRY PLANT PRICE LIST.

CHOICE RASPBERRIES

Our raspberry fields have all been twice state inspected during the past summer and certified free from all dangerous raspberry diseases, such as Anthracnose, Mosaic, Root Gall, Blue Stem, etc. A certificate of this inspection accompanies every shipment of our Raspberry plants. Buy our Raspberry stock and be assured disease-free plants that are guaranteed true-to-name.

EARLY KING THE EARLY MARKET RED

We recommend this variety as the best early red raspberry grown. It is extremely early and enormously productive of large, firm, bright red berries. The berries are very attractive in appearance, easy to pick, and unlike other varieties, will not turn dark if allowed to become over ripe. They are excellent shippers and will bring the top market price. The canes are hardy and thrifty. The Early King has rapidly become one of the leading varieties of red raspberries in all parts of the country as it is well adapted to all soils and climatic conditions.

CUMBERLAND THE MOST PROFITABLE BLACKCAP

The most extensively grown variety of Black Caps. In this section they are planted almost exclusively for fruit. The berries are immense in size, firm and extra productive. Fruit is jet black in color, giving it a beautiful appearance in the crate and is of excellent quality. Canes are hardy, strong and vigorous, and will withstand most severe winters unharmed. We guarantee our Cumberland to be first class and true to name. They are all freshly dug in the spring and are not storage stock.

CUTHBERT THE RICHEST FLAVORED RED

This is the leading late variety all over the country. The canes are very thrifty growers, upright in shape, light yellow in color. Fruit is dark red, large, oblong in shape, and firm enough to stand shipping in pint boxes. Very productive. However, it is the flavor of the Cuthbert that gives it distinction. It is sweet, rich, and luscious and surpasses all others for home use and canning. A great market sort and will stand shipping well. Adapted to both north and south.

LATHAM FAMOUS NEW RED RASPBERRY

An outstanding variety of Red Raspberry originated by the Minnesota State Farm.

Latham Raspberries

Although new, it has entirely passed the experimental stage. It has proven enormously productive in a commercial way, yielding one-half again as many quarts per acre as Cuthbert, with which it ripens. Quality of first rank. Excellent for shipping and home use. The giant, bright red berries are decidedly attractive and command higher prices than others in the same market. It is a strong grower; canes are tall and extra heavy with dark green foliage. Having originated in Minnesota, it naturally is extremely hardy and can be planted with success assured. Our plants are strong and free from disease.

ST. REGIS EVERBEARING RED RASPBERRY

Berries large, beautiful and attractive. Does well in all soils. Strong, healthful grower. Stocky with dark green foliage. Plants set in spring will give moderate crop the following fall. About middle of August it commences to set fruit on the young canes and bears continuously until frost, during a favorable growing season. Berries bright, crimson, rich, sugary and has the wild raspberry flavor. Flesh firm and meaty. A good shipper and wonderfully productive. First or main crop very early and equal of other red varieties.

(All Raspberries are priced on page 23).

Cumberland, The Most Profitable Blackcap

ELDORADO BLACKBERRIES

THE GREATEST BLACKBERRY UNDER CULTIVATION

Eldorado Blackberry

This is the finest blackberry grown. Its large size and delicious quality put it far in advance of other standard varieties. It is the hardest blackberry under cultivation and will withstand the northern climate uninjured. It is very productive and has not failed to ripen a crop since its introduction, so we have confidence in recommending it as far superior to anything we know of on the market. It has been cultivated twenty years and under careful tests at the experiment station has never winter killed or failed to produce a full crop of the finest fruit. The canes are very vigorous and hardy, enduring the winter of the far northwest without injury, and their yield of fruit is enormous. The berries are large, jet black, borne in large clusters and ripen well together. They are large, sweet, melting and pleasing to the taste, have no hard core and keep four to five days after picking with quality unimpaired.

ASPARAGUS

The culture of this early and delicious vegetable is usually very profitable. It comes early in the season when there is little else to market and the proceeds are quite acceptable. It is a rank feeder and must be manured very highly. Plow or spade the ground at least a foot deep, work in and mix thoroughly with the

soil, plenty of rich, well-rotted manure. For field culture plant in rows three and one-half to four feet apart and one and one-half in the row. But for home use it may be planted one and one-half feet apart each way and some three inches deep. Keep the ground clear of weeds. Give bed a good coat of rich manure every fall if possible.

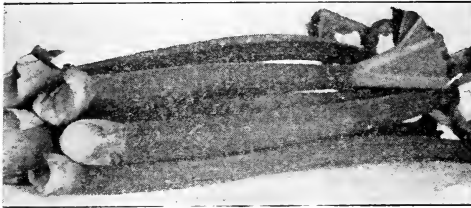

Martha Washington

MARTHA WASHINGTON

— This variety is the result of careful breeding by the U. S. Department of Agriculture, Washington, D. C. with the object of eliminating rust. It produces large, straight shoots of a dark green color. The tips are tight and firm and do not open out or begin to branch until well out of the ground; a very valuable feature.

Will you please send me your catalog for 1930. I have had better results from what I got from you than anywhere I have ever dealt. Marvin L. Teeter, Columbus Jct., Ia. 1-13-30.

Myatt's Linneaus

Rhubarb or Pieplant

Coming on so early, Rhubarb finds a ready market, being relished by everyone. The city garden should have a dozen or more hills and every farm can add to its income by raising Rhubarb. It is easily produced in a commercial way, yields immensely, can be shipped almost any distance, and is easily gathered and packed.

MYATT'S LINNEAUS—Early, just before Asparagus; immense stalks, tender, delicious flavored; productive and continues long in use; the best variety for general use. Large, thrifty roots.

CHOICE GRAPES

When you plant a vineyard you invest in something permanent. You will receive a regular yearly income from it as long as you live. Practically all the cultivation is done by horse power and very little hand work is required. Returns per acre are high considering the amount of labor required to produce a crop. Grapes are being planted extensively in all sections of the country and an ever expanding market creates a demand far ahead of the supply. Plant a vineyard of our Concord plants this spring and cash in on this opportunity for pleasant, profitable fruit growing.

CAMPBELL'S EARLY—A strikingly handsome, large black early grape with blue bloom. Tough skin and good shipper. Coloring up ten days before ripening, and will hang six weeks on the vine. Flesh sweet though not high flavored, and rather hard

and pulpy, but without any inner acidity about the seeds, which are small and few and separate readily from the pulp. Bunches large and compact, often double-shouldered. Must be pruned closely. Inclined to overbear. Excellent commercial sort for northern latitudes.

SELECTED GRAPES (Continued)

CATAWBA — A well-known, chocolate-colored grape of a rich musky flavor. A great wine grape; fine for dessert. Bunches large and loose; berries large and coppery red, becoming purplish when well ripened. Ripens soon after Concord.

CONCORD — Still the most popular grape in America, and grown with success in every state in the union. It will adapt itself to almost any condition of soil and climate and is the biggest money maker of grapes. The bunches are large and well filled and berries are large, purplish black, and of excellent quality. Vines are vigorous, hardy, and free from disease.

MOORE'S EARLY — A seedling of the Concord, which it resembles. One of the best early black grapes grown. Bunches medium large, inclined to looseness. Berries very large and round. Quality good. Vine vigorous and hardy. Ripens about ten days ahead of the Concord.

NIAGARA — A magnificent white grape, valuable for garden and vineyard. Berries large, tough skin; quality very good; beautiful bunches of the largest size. Ripens about with Concord. A rank grower and very productive.

For prices of grape vines, see page 23.

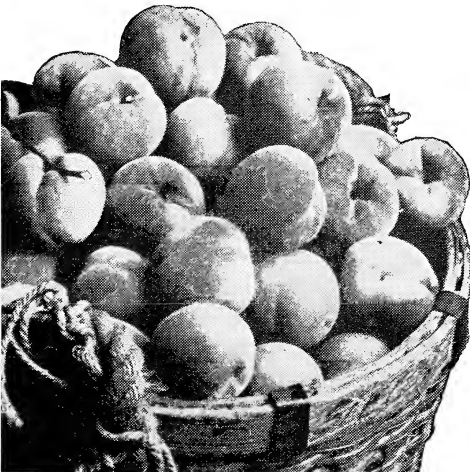

Hardy Northern Grown Fruit Trees

Our fruit trees are all healthy, thrifty stock, and quality and size have not been skimmed to make a low price. We are listing the best and most popular varieties and are in position to furnish in large quantities to commercial growers. If interested in a large planting send us your list for special quotations.

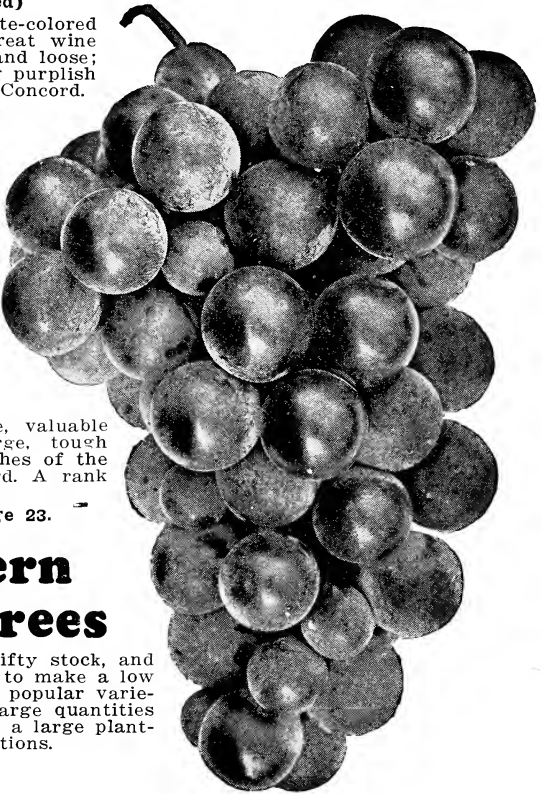

Peaches

PRICE — All varieties, 1 yr. 4 to 6 ft., trees, 30c each; 10 for \$2.75; 100 for \$25.00. Express only.

ELBERTA — The standard market peach of the country. Very large, red blush; flesh yellow, tender, and juicy. Rank, vigorous grower. Freestone. Ripens middle of September.

Elberta Peaches

Concord Grapes

J. H. HALE — Fruit extra large. Ripens about a week earlier than Elberta and averages a third larger in size. Color beautiful golden yellow with deep carmine blush. Flavor is extra fine.

ROCHESTER — First, large yellow freestone peach to ripen. Fruit sweet, juicy, and of delicious flavor. Excellent market or home use variety.

SOUTH HAVEN — New and very popular. Has all the good qualities of Elberta but ripens two weeks earlier. Very similar to Elberta in every way.

SIZE OF TREES

Our Fruit Trees are all graded to the standards of the American Association of Nurserymen. Peach are all 1-yr. 9-16 inch caliper, trees, 4 to 6 ft. high. All other trees are 2-yr. 9-16 inch caliper, 4 to 6 ft. high.

Some firms are listing this same grade of tree as a 5 to 6 ft. tree, thus attempting to give the impression that their stock is larger. Do not be misled — buy your trees by caliper. Remember, our trees are all 9-16 inch caliper, and up. This size is too large for parcel post shipment and must be forwarded by express.

The raspberry plants I received this week are planted and it won't be your fault if they don't grow. They were so nice that they could be no better. Mrs. Homer Adams, Celina, O. 5-2-30.

Apples

PRICE—All varieties, 2 yr., 4 to 6 ft. trees, 35c each; 10 for \$3.00; 100 for \$25.00. Express only.

BALDWIN—Winter Apple. Large, roundish, dark red. Juicy, sub-acid. Good flavor, good cooker, good keeper. Tree vigorous and upright.

DELICIOUS—Grand champion of winter apples. Red with pin dots of yellow. Fine grain, crisp, juicy, almost sweet. Good keeper and sells high on any market. Our most popular variety.

JONATHAN—A grand, good winter apple. Bright, solid red. Flesh white, firm, fine, crisp and tender. Good size, smooth, roundish. Excellent eating apple.

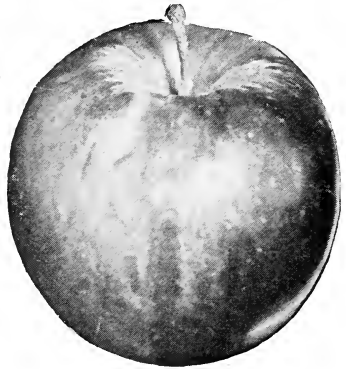

GRIMES GOLDEN—Large sized, golden-yellow, winter apple with extra fine flavor and good keeping qualities. Rich sub-acid pear flavor. Bears young.

MCINTOSH RED—One of the very best early winter apples. Bright, deep red color. Flesh white, tender, juicy, with a rich, delicious and very distinctive flavor. Trees hardy, vigorous and healthy.

NORTHERN SPY—Large, pale yellow, skin mottled with carmine. Firm, tender, crisp, juicy, sub-acid. Popular everywhere. Good keeper.

STAYMAN'S WINESAP—Dark rich red striped with crimson. Flesh tinged with yellow; firm, crisp, fine grained, very juicy, sub-acid flavor. A good one. Winter variety.

TOLMAN SWEET—Yellow. One of the best sweet winter apples. December to March.

Jonathan Apple

WEALTHY—Ripens late summer and early autumn. Perfectly hardy, vigorous and productive. Fruit large, red streaked with white. Quality excellent.

YELLOW TRANSPARENT—Fruit a clear yellowish-white. Begins to ripen in July. Excellent eating and cooking apple, and best market sort. Bears in 3 to 4 years. The leading summer apple.

HYSLOP CRAB—Best, most widely grown variety. Red, firm, juicy; excellent for home use. Always sells well.

Cherries

Montmorency Cherry

PRICE—**SOOR**: 2 yr. 4 to 6 ft. trees, 50c each; 10 for \$4.50; 100 for \$40.00.

SWEET—2 yr. 4 to 6 ft. trees, 60c each; 10 for \$5.00; 100 for \$45.00. Express only.

EARLY RICHMOND (Sour)—Best early cherry, much like Montmorency, except a little smaller and trifle more acid. A good standard sort. Bright red and juicy. Heavy bearer.

MONTMORENCY (Sour)—Large, late, heavy cropper of dark red cherries. Thick meat and juicy, yet the best shipper known. Its size and flavor as well as general appearance make it the leader everywhere as a main crop cherry.

BLACK TARTARIAN (Sweet)—Very large purplish black, heart shaped; flesh mild and sweet, and quality excellent. Good market sort and we recommend it as the best sweet for home use. Ripens in July.

NAPOLEON (Sweet)—Fruit is very large, oblong, light lemon-yellow with a red cheek. Tree is medium sized and erect. A beautiful and delicious fruit.

Pears

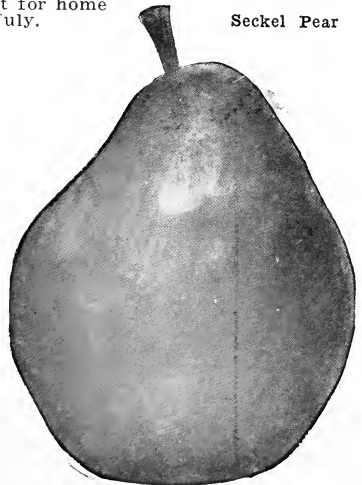

PRICE—All varieties, 2 yr., 4 to 6 ft. trees, 50c each; 10 for \$4.50; 100 for \$40.00. Express only.

BARTLETT—The leading commercial and home use pear. Big producer. Early; golden colored, sometimes with red cheek. Flavor is melting, rich and buttery. Good for any and every use. Ripens about first of September.

KIEFFER—Late fall and winter pear. Tree is hardy and almost entirely disease-resistant. Will grow and produce where other varieties will not survive. Fruit is large, greenish yellow. Quality not so good as Bartlett but is excellent if properly canned.

CLAPP'S FAVORITE—Ripens early August. A seedling of Bartlett but earlier ripening; somewhat larger; lemon yellow; of very good eating quality.

SECKEL (Sugar Pear)—Small, very juicy and sweet. Popular for pickling and preserving. Claimed to be the best flavored pear grown.

Seckel Pear

PLUMS

PRICE—All varieties, 2 yr. 4 to 6 ft. trees, 45c each; 10 for \$4.00; 100 for \$35.00. Express only.

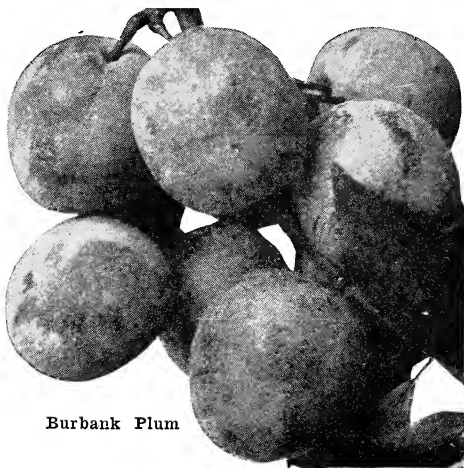

BRADSHAW—A splendid early. Large, dark violet red. Flesh yellow, juicy, good. Fine for canning.

BURBANK—Fruit large, oval, with reddish purple skin. Heavy yielder and very hardy. Good flavor; more acid than the Bradshaw.

GERMAN PRUNE—Old favorite. Fruit is long, oval, purple with a thick blue bloom. Flesh is firm, sweet and pleasant, separating freely from the stone.

YELLOW EGG—Golden yellow covered with thick bloom. Flesh golden yellow. Rather juicy. Tree large, very productive.

MONARCH—Late, large. Dark purplish blue; perfect freestone. Flesh is pale golden green and juicy. Heavy bearer and begins fruiting young.

Burbank Plum

EVERGREENS

EXPRESS SHIPMENT ONLY

Our Evergreens are properly grown, and as they have been several times transplanted, they have a perfect root system, thereby assuring success to the planter. Every Evergreen offered in this catalog, unless otherwise stated, is taken from the field with the roots securely closed in a ball of earth and this bound on with a piece of burlap. Do not let the sun or wind strike the roots of Evergreens even for a few minutes; you will kill them if you do. When you receive trees, have hole ready, remove burlap (but not dirt), plant immediately, water thoroughly but do not apply over foliage.

ARBOR VITAE, Globe—Forms a dense, low globe, handsome shade of light green with grayish cast. Excellent for tub and window box use, as well as in the foreground of Evergreen groups. 12-18 in., \$1.25 each; 18-24 in., \$2.50 each.

ARBOR VITAE, American—Of erect, broadly pyramidal habit, with soft bright green foliage, dense from ground up. One of the finest Evergreens for hedges. Grows rapidly and may be pruned as desired. Also excellent for grouping or formal use. 18-24 in., \$1.25 each; 2-3 ft., \$2.00 each.

ARBOR VITAE, Pyramidal—Forms a tall, slender column, in form almost a counterpart of the Irish Juniper. Densely branched; foliage a deep green, retaining color. 18-24 in., \$1.25; 2-3 ft., \$2.00 each; 3-4 ft., \$5.00 each.

FIR, Douglas—A large and beautiful Evergreen. Dark green foliage and entirely hardy. Has a graceful pyramidal habit and resembles the Blue Spruce. 18-24 in., \$1.25 each.

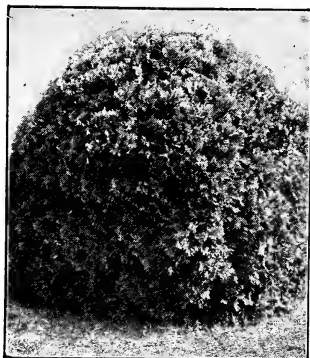

JUNIPER, Irish—Erect, slender and formal in habit; foliage sage green, very compact; making a splendid column eventually. 15 to 20 feet high. 18-24 in., \$1.25 each; 2-3 ft., \$3.00 each; 3-4 ft., \$5.00 each.

PINE, Scotch—A native of the British Islands. A fine, robust, rapid growing tree, with stout, erect shoots and silvery green foliage. Very hardy, valuable for shelter. Cannot be shipped west of the Mississippi River. 18-24 in., \$1.25 each; 2-3 ft., \$2.50 each; 3-4 ft., \$4.00 each.

SPRUCE, Norway—A lofty, elegant tree of perfect pyramidal habit, remarkably picturesque and beautiful. Very popular and deservedly so. One of the best hedge and wind-break trees, holding its lower branches well down against the ground. 18-24 in., \$1.25 each; 2-3 ft., \$2.00 ea.; 3-4 ft. \$3.00 each.

Pyramidal

Globe Arbor Vitae

SPRUCE, Colorado Blue—One of the hardiest and most beautiful of all the Spruces. Compact, upright retaining its branches to the ground. Foliage of a light blue or sage color. 10-12 in., roots packed in damp moss, 75c each; 12-18 in., balled and burlapped, \$3.00 each.

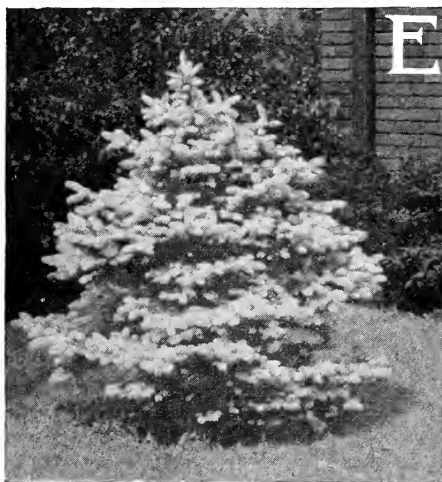

SMALL EVERGREEN BARGAINS

COLORADO BLUE SPRUCE—Described above.

AUSTRIAN PINE—Tall, massive tree, with heavy, plumed, spreading branches and rather stiff, dark green needles.

MUGHO PINE—Dwarf. Tree is broader, than it is high, forming a dark dome-shaped bush. Very effective.

So long as they last, we offer one each of these three Evergreens, in 8-10 inch size, transplanted stock, roots well packed in damp moss, 3 Evergreens for 75c.

Colorado Blue Spruce

Evergreens For Rockeries, Lily Pools and Foundation Plantings

JUNIPER PFITZERIANA—An excellent spreading variety, forming a rather irregular, broad pyramid. Entirely hardy. Used in mass effects and as a cover for rough places in landscape work. 12-18 in., \$1.00 each.

JUNIPER PROSTRATA—A low spreading variety, hugging the ground and rarely exceeding 4 ft. in height. Excellent for hedges of lily pools and for covering rockeries. 12-18 in., \$1.00 each.

SPECIAL EVERGREEN PRICES

If you are interested in kinds of Evergreens not listed on this and preceding page, or require different sizes of the kinds we do list, be sure to send us a list of your wants for special prices. We have many kinds and sizes of Evergreens in lots too small to list, on which we can save you some money. Remember, our Evergreens are all several times transplanted to produce the best possible root system, and are carefully dug and balled and burlapped in the field. Our prices are as low, or lower, than you would pay in other places for inferior stock.

JUNIPER SABINA—A low, dwarf-like species, with semi-upright branches bearing dense foliage, rarely exceeding a height of 5 or 6 ft. Entirely hardy, making a very good rockery shrub. 12-18 in., \$1.00 each.

COTONEASTER, Horizontalis—A prostrate evergreen shrub that is very beautiful for an evergreen border. Waxy green leaves that remain on the shrub all winter. Very useful in rockeries and for edging other shrub plantings. 8-12 in., 75c each.

MAHONIA AQUIFOLIA (Holly Leaved Barberry)—A hardy, native, evergreen shrub having holly-like leaves. Medium size and showy. Bright yellow flowers in May followed by bluish berries. Will do well in partial shade. Very useful in decorative planting for its neat habit and bronze-green leaves. 8-12 in., 75c each.

HARDY AZALIA—The Azalia is one of the handsomest of early blooming shrubs, bearing a profusion of large orange and yellow flowers in early spring. A rather slow-grower but develops into a wonderful specimen as the years go by. Excellent for foundation planting. 5-yr. 12-18 in. clumps, \$2.00 each.

Juniper Sabina

IMPORTANT

All Evergreen Trees and Evergreen Shrubs listed herein will be shipped direct to you from our branch nursery at Middlebury, Ind. This assures you prompt shipment, freshly dug stock, and enables us to name these low prices through savings affected in curtailed handling and repacking charges.

HARDY ORNAMENTAL SHRUBS

Our shrubs are all heavy, bushy, transplanted, field-grown stocks. Two and three years old. Please do not confuse them with the cheap 1 year old cutting stock offered by many firms at bargain prices. Quality considered, you will find our prices the lowest in the field.

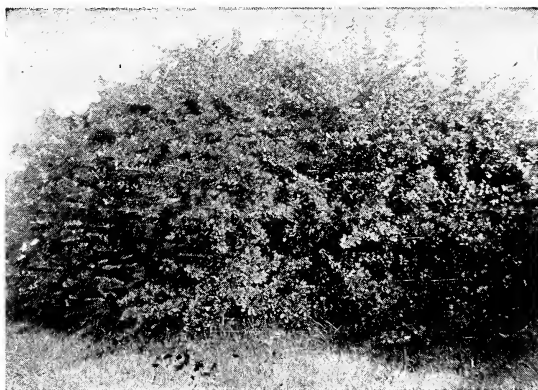

SIZE—The shrubs offered herein are all heavy, thrifty 2-year-old stock, 18 to 24 inches high except where otherwise noted.

Althea (Rose of Sharon)

ALTHEA (Rose of Sharon)—This beautiful shrub flowers late in the summer when most others are out of bloom. It bears large, double flowers similar to the Hollyhock, very abundantly on strong, erect branches. Colors: White, Red, Pink, and Blue, all double. State colors. 18 to 24 inches, each 20c; 3 for 55c; 10 for \$1.75.

BARBERRY (Japanese Red Leaf)—A new and outstanding novelty that is really worth while. It is similar in all respects to the green-leaved Japanese Barberry, but the foliage is of a rich, lustrous, bronzy red. The color will not fade during the summer but become more brilliant and gorgeous as the season advances. In the fall its foliage changes to vivid orange, scarlet and red shades, more brilliant and more effective than the ordinary Japanese Barberry. Must be planted in full exposure to the sun to develop full coloring. 12 to 15 inches, each 50c; 3 for \$1.40; 10 for \$4.50.

New Red Leaved Japanese Barberry

BARBERRY (Japanese)—Probably the most common and hardiest of hedge plants and also used for grouping in front of taller growing shrubs. It is a dwarf, compact shrub with many small leaves which change to colors, orange-red to bronze in the autumn. Bright red berries are present and remain throughout the winter. 18 to 24 inches, each 25c; 3 for 65c; 10 for \$2.00.

BUDDLEIA (Butterfly Bush)—This shrub, set out in spring, will mature to full size the first year. A single plant will show, the first season, as many as fifty flower spikes of beautiful lilac color. Both foliage and blooms very attractive. Perfectly hardy but semi-herbaceous. Large 2 yr. No. 1 bushes, each 25c; 3 for 65c; 10 for \$2.00.

Buddleia (Butterfly Bush)

CALYCANTHUS (Sweet scented Shrub)—A very desirable shrub having rare and peculiar fragrance of wood and flowers. Blooms in June and at intervals through the summer. Flowers chocolate brown in color. 18 to 24 inches, each 45c; 3 for \$1.20.

CORNUS LUTEI (Yellow branched Dogwood)—Bright yellow bark. Makes an attractive combination with Red branched Dogwood. 18 to 24 inches, each 25c; 3 for 65c; 10 for \$2.00.

CORNUS SIBERICA (Red branched Dogwood)—Has an upright spreading habit and slender bright red branches, which add a touch of color to the shrubbery during the winter. Abundant small white blossoms borne in early summer. 2 to 3 ft., each 25c; 3 for 65c; 10 for \$2.00.

Received the plants and roses O. K. and they were in fine shape. S. Chezem, Hesper, Kans. 4-10-30.

Deutzia, Pride of Rochester

DEUTZIA GRACILIS—Slender branched variety, dwarf habit and very early flowering. Flowers pure white and very abundant. 15 to 18 inches, each 35c; 3 for \$1.00; 10 for \$3.00.

DEUTZIA, PRIDE OF ROCHESTER—Flowers double white, back of petals tinged with rose. Flowers in June. Growth vigorous; profuse bloomer. Usually considered the best of the Deutzias. 18 to 24 inches, each 25c; 3 for 65c; 10 for \$2.00.

FLOWERING ALMOND—Early spring flowering shrub whose flowers appear before the leaves. Flowers, double pink, snuggling tight to the twigs. 18 to 24 inches, each 45c; 3 for \$1.20.

FORSYTHIA INTERMEDIA (Golden Bell)—Beautiful early flowering shrub that produces golden yellow flowers before the leaves appear in the early spring. Profuse bloomer. 18 to 24 inches, each 25c; 3 for 65c; 10 for \$2.00.

GOLDEN ELDER—Handsome variety with golden yellow foliage, contrasting beautifully with other shrubs. The flowers are white, in flat-topped cymes in early summer. Grows naturally from 10 to 12 feet, but can be pruned into a neat little bush. 18 to 24 inches, each 30c; 3 for 80c; 10 for \$2.50.

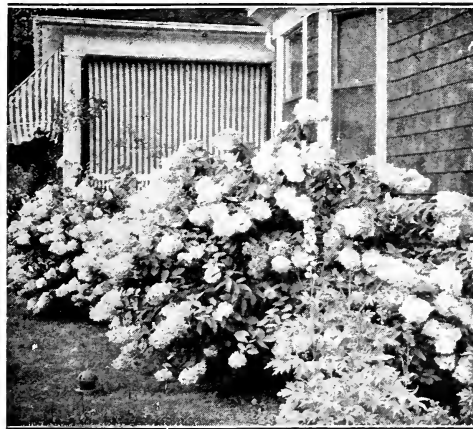

HONEYSUCKLE (Tartarian)—The finest and best known of all Bush Honeysuckles. Has upright, somewhat spreading branches and bright green foliage. The bright pink flowers are borne freely in May and June, followed by showy red berries. 18 to 24 inches, each 25c; 3 for 65c; 10 for \$2.00.

HYDRANGEA ARBORESCENS (Hills of Snow)—A pure white summer blooming Hydrangea. Sometimes called Snowball Hydrangea. Pure white flowers are borne in pyramidal panicles 5 to 8 inches in diameter and 8 to 10 inches long. 18 to 24 inches, each 35c; 3 for \$1.00; 10 for \$3.00.

HYDRANGEA PANICULATA GRANDIFLORA (PeeGee)—Flowers in August and continues until frost, bearing immense panicles of bloom a foot long, white at first, turning to rose pink and bronze in autumn. The most popular of Hydrangeas. 18 to 24 inches, each 35c; 3 for \$1.00; 10 for \$3.00.

Forsythia

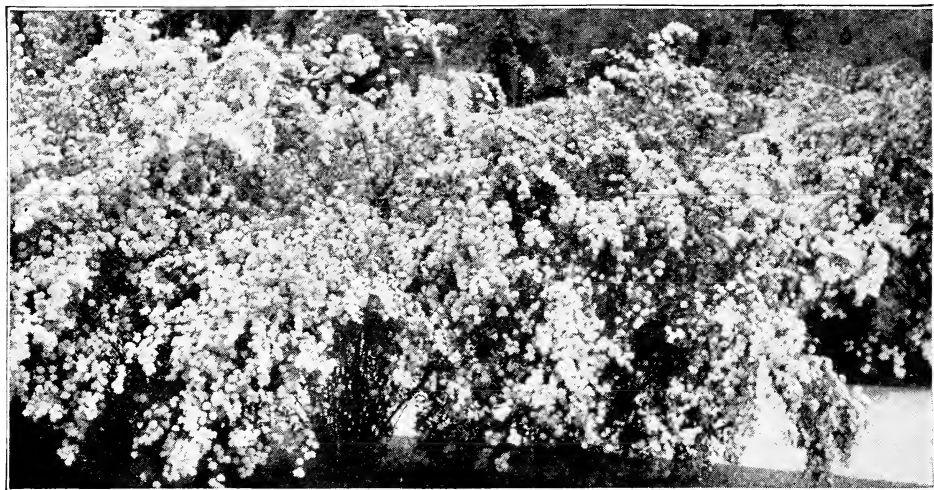

Hydrangea (P. G.)

JAPANESE QUINCE—Commonly called Flowering Quince or Fire Bush. A small spreading shrub, with spiny branches. Double crimson flowers in great profusion early in the spring. Foliage a dark glossy green. Bears yellow, pear-shaped fruit. 18 to 24 inches, each 40c; 3 for \$1.05.

LILAC (Persian Purple)—A thrifty growing bush with slender leaves and deep purple flowers. Flowers a little later than common varieties but flowers last longer and are very fragrant. 18 to 24 inches, each 40c; 3 for \$1.05.

PHILADELPHUS CORONARIUS—The old fashioned Mock Orange or Syringa. Beautiful free flowering shrub with sweet scented white flowers with a creamy tinge. Flowers appear in May and June. 18 to 24 inches, each 25c; 3 for 65c; 10 for \$2.00.

Spirea Van Houttei

KOLKOWITZIA (The new Beauty Bush)—An exceedingly handsome new ornamental shrub which has come to us from the wilderness of China and Central Asia. Foliage and habit attractive even when bush is out of flower; perfectly hardy. It grows 6 to 9 feet high when matured, erect and twiggy, producing long, arching branches covered in spring with clusters of small, tubular flowers of the honeysuckle type, borne in such profusion that the bush is one cloud of delicate pink. Beauty Bush has all the merits of a perfect shrub; hardiness, year around beauty in foliage and habit, and an amazing profusion of flowers of beautiful color. 12 to 18 inches, each 75c; 3 for \$2.10.

PHILADELPHUS VIRGINALIS—Blooms throughout the season. One of the most beautiful new varieties of Mock Orange. A vigorous, tall grower, very large, double-crested flowers with round petals; pure white, sweetly scented clusters of blossoms. 18 to 24 ins., 40c; 3 for \$1.10; 10 for \$3.25.

RHUS COTINUS (Purple Fringe or Smoke Tree)—Conspicuous spreading shrub, growing in tree-like proportions overhung in mid-summer by mist-like clouds of tiny flowers. These billowing panicles of light lavender give the impression of smoke

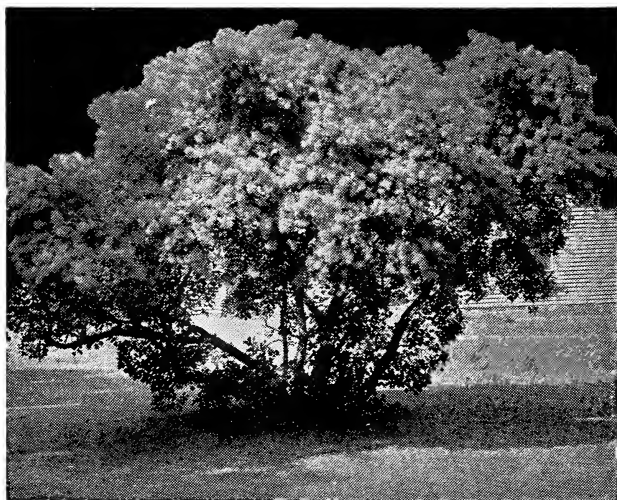

White Snowberry

at a distance. One of the most beautiful of all large shrubs. 2-3 ft., each 75c; 3 for \$2.00.

SPIREA ANTHONY WATERER—A dwarf growing bush covered throughout the summer with large trusses of deep crimson flowers. Leaves bright green, often with variegations of yellow, with incised serrate borders. 12 to 18 inches, each 30c; 3 for 80c; 10 for \$2.50.

SPIREA ARGUTA—One of the showiest of spring shrubs, flowering in early May; dense masses of white flower clusters along drooping branches; Leaves light green, narrow giving lace-like, beautifully soft appearance. 18-24 ins., ea., 30c; 3 for 80c; 10 for \$2.50.

SPIREA FROEBELI—A semi-dwarf similar to Anthony Waterer, but taller and leaves reddish green. Bright crimson flowers in dense corymbs during July and August. 18 to 24 inches, each 30c; 3 for 80c; 10 for \$2.50.

Rhus Cotinus

SPIREA VAN HOUTTEI (Bridal Wreath)

—A leader among shrubs, and a beautiful ornament at all seasons. A round and graceful bush with arching branches, covered with white flowers in the spring. No doubt one of the most useful of all shrubs. 18 to 24 inch, each 15c; 3 for 40c; 10 for \$1.20; 100 for \$9.00. 2 to 3 ft. size, each 25c; 3 for 70c; 10 for \$2.10; 100 for \$15.00.

SNOWBERRY, RED (Coralberry)

—A slender-branched upright shrub with very persistent foliage and purplish-red fruit that hangs on well into winter. Also known as Indian Currant. Flowers small and rose-colored. 18 to 24 inches, each 20c; 3 for 55c; 10 for \$1.75.

SNOWBERRY, WHITE (Common Snowberry)

—Small rose-colored flowers in June and July, followed by large clustered, milk-white fruits, which remain far into the winter. The combination of pink flowers and white berries on the same twig is charming. 18 to 24 inches, each 20c; 3 for 55c; 10 for \$1.75.

SNOWBALL

—Common variety familiar to everyone. Flowers in early spring and usually can be picked by Decoration Day. Flowers are snow white and ball shaped. 18 to 24 inches, each 45c; 3 for \$1.20.

TAMARIX AFRICANA

—Fine feathery foliage like that of Juniper. Delicate pink flowers, borne profusely on graceful drooping branches. Hardy and will do well in the poorest, dry, sandy soil. 18 to 24 inches, each 25c; 3 for 65c; 10 for \$2.00.

WEIGELA, Rosea

—A May to July flowering shrub with stemless bell-shaped flowers set along the stems in clustered profusion. Bright rose shade. 18 to 24 inches, each 25c; 3 for 70c; 10 for \$2.10.

Tamarix Africana

WEIGELA, Eva Rathke—Large, brilliant crimson flowers completely cover the whole plant during early summer, and continue to bloom on the new growth through the summer and autumn months. One of the newer, very popular Weigelas. 18 to 24 inches, each 40c; 3 for \$1.10; 10 for \$3.25.

WEIGELA, Variegated—This is perhaps second to no other hardwooded plant with variously colored leaves. It stands the sun well and retains its well marked tints until Autumn. The flowers are a lighter shade of pink than the Rosea, but it is equally as free in bloom. 18 to 24 inches, each 35c; 3 for \$1.00; 10 for \$3.00.

Find enclosed my order for trees and shrubs also check for \$12.01. I have compared your price with ----- I find for the same bill, his price would be \$21.28 or \$9.27 more. There should be more who know of your saving on nursery stock. I had some of your shrubs and strawberry plants last year, which were all good. E. E. Spalti, Oakland, Ia. 3-6-30

Snowball

Weigela Eva Rathke

The Best Ornamental Hedge Shrubs

Amoor River North Privet

AMoor RIVER NORTH PRIVET—Will grow to ten feet in height, but may be pruned to any height and sheared to desired form. Branches are upright; foliage oval or oblong. Can be made very dense by pruning. Rapid grower. Resembles California Privet, but is entirely hardy while California will winterkill badly in the northern states. We offer two grades in this Privet, the 2 year size being heavier rooted and having larger, bushier top. **Price, 1 yr. 12 to 15 inch tops, 25 for \$1.50; 50 for \$2.50; 100 for \$4.00. 2 yr. 15 to 18 inch branched tops, 25 for \$1.75; 50 for \$3.00; 100 for \$5.00.**

JAPANESE BARBERRY—Considered by many as the most perfect hedge shrub. See page 12. **Size, 2 yr. 12 to 18 inch branched tops, 25 for \$2.25; 50 for \$4.00; 100 for \$7.50.**

SPIREA VAN HOUTTEI—This popular shrub makes a most beautiful ornamental hedge. See page 15. **2 yr. 18 to 24 inch, bushy tops, 25 for \$2.75; 50 for \$5.00; 100 for \$9.00. 1 yr. 12 to 18 inch., 25 for \$1.75; 50 for \$3.00; 100 for \$5.00.**

HARDY CLIMBING VINES

ALL 2 YEAR NO. 1 STOCK

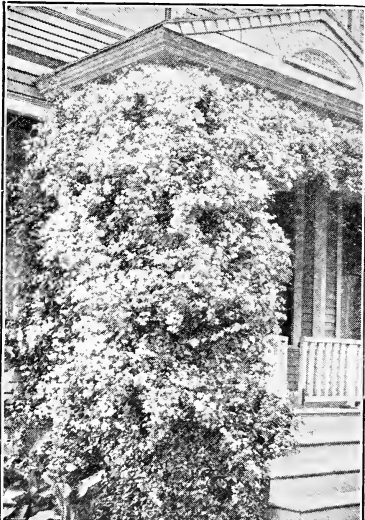

BOSTON IVY—From Japan. It is a splendid plant for covering any object, as it clings perfectly to the smoothest surfaces. The foliage is a bright glossy green, changing to bright tints of scarlet crimson, and orange in the fall. **Each 35c; 3 for 90c.**

CLEMATIS, Paniculata (Japanese Clematis)—A Japanese plant possessing unusual merit. Very rapid growth, quickly covering trellises and arbors with handsome, clean, glossy green foliage. Flowers are medium size, pure white, borne in immense sheets and of a most delicious fragrance. **Each 30c; 3 for 75c.**

DUTCHMAN'S PIPE—A native species of climbing habit and rapid growth, with magnificent light green foliage, ten to twelve inches in diameter, and curious pipe-shaped, yellowish brown flowers. A splendid variety for archways or verandas. **Each 50c; 3 for \$1.25.**

HONEYSUCKLE (Hall's Japanese)—A strong, vigorous evergreen variety, with pure white flowers, changing to yellow. Very fragrant; covered with flowers from June to November. **Each 27c; 3 for 70c.**

WISTERIA, Chinese Purple—Strong, rapid grower, desirable for trellises, porches, etc. The light purple flowers are very showy and are produced in long racemes. Perfectly hardy. **Each 30c; 3 for 75c.**

Clematis Paniculata

Select Beautiful Roses

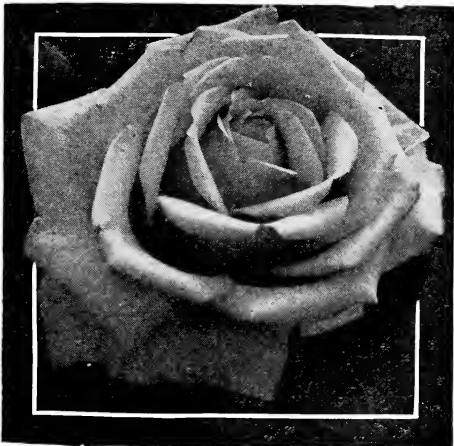

All strong 2-year field grown bushes.

EVERBLOOMING HYBRID TEA ROSES

GRUSS AN TEPLITZ—The choicest of bright, vivid scarlet roses, shading to crimson. Flowers open loosely. Very fragrant. Hardy and strong, and blooms continuously until November. Each 50c; 3 for \$1.35.

MADAME CAROLINE TESTOUT—Extra large, fragrant blooms of brilliant pink with darker center. Edges of petals tinged with soft carmine pink. Very free blooming, and hardy. Each 50c; 3 for \$1.35.

MRS. AARON WARD—One of the few hardy yellow, monthly roses. Small, dainty flowers of Indian yellow, edge of petals being tinged with creamy-yellow and pink. Foliage bronze green. Plant is small, but strong and thrifty in growth. Each 60c; 3 for \$1.50.

Paul Neyron

HARDY PERPETUAL OR JUNE ROSES

FRAU KARL DRUSCHKI (White American Beauty)—Really an ever-blooming variety, bearing a heavy crop of blossoms in June and from then, every month, until frost. The long pointed, egg-shaped buds open loosely into blossoms of pure white, with just a suggestion of pink, sometimes measuring 6 inches across. Each 45c; 3 for \$1.20.

GENERAL JACQUEMINOT—The favorite old "Jack" Rose, known and loved everywhere. Blossoms of a rich, velvety crimson with large petals. Blooms freely and grows well anywhere. Hardy. Each 45c; 3 for \$1.20.

PAUL NEYRON (Peony Rose)—The largest rose of all. Blossoms of clear pink shading to rose. Flowers are well-shaped, double and very fragrant. Plant is erect in habit and a strong, heavy grower, blooming repeatedly during the season. Each 45c; 3 for \$1.20.

ULRICH BRUNNER—A bright cherry-red rose of striking beauty. The flowers are unusually large. Hardy and vigorous. Almost continuously in bloom from early summer until autumn. Each 45c; 3 for \$1.20.

General Jacqueminot

HARDY CLIMBING ROSES

CRIMSON RAMBLER—Great masses of crimson, semi-double flowers are borne by these vigorous plants. Desirable pillar and porch plant. Each 30c; 3 for 80c.

DOROTHY PERKINS—One of the most notable climbing Roses. Clear cherry-pink, slightly fragrant; borne in great profusion and lasts a long time. Each 25c; 3 for 60c.

EXCELSA (Red Dorothy Perkins)—An intense crimson, with the edges of the petals a little lighter, produced in immense clusters. Foliage glossy. Each 30c; 3 for 80c.

PAUL'S SCARLET CLIMBER—A new rose of brilliant, vivid scarlet maintained without burning or bleaching until the petals fall. Semi-double flowers of medium size completely cover the vine. A most important addition to climbing roses. Each 40c; 3 for \$1.05.

WHITE DOROTHY PERKINS—Closely resembles Dorothy Perkins, except for its immense clusters of pure white flowers. The most valuable white climber of its class. Each 30c; 3 for 80c.

A Rose Hedge

CHOICE DAHLIAS

Our Dahlia orders are filled with good thrifty divisions of field-grown clumps. We guarantee them true to name and free from disease. We are growing all the Dahlias we offer in this list. It will pay you in the purchase of Dahlias to buy direct from a grower who can supply his own stock as this lessens the chance of mistakes.

**ALL DAHLIA PRICES ARE POSTPAID
TO YOUR DOOR.**

MISS HELEN HOLLIS—Gigantic flowers of deep scarlet on long, erect stems. Each 25c.

YELLOW DUKE—Yellow, good form. Each 25c.

Rokely's Select Gladioli

Gladioli do their very best in a rich, sandy loam, but they will thrive in any soil except a very stiff clay. Bulbs should be planted during April and May depending on soil and climate. In planting, the rule is to plant each bulb at least three times the depth of its diameter, with the pointed side of the bulb up. We grow our own Gladioli Bulbs and your order will be filled with plump, healthy stock.

PRICES GIVEN HERE ARE POSTPAID

—50 bulbs at the 100 rate; 6 at the dozen rate. However, only one variety can be used to secure dozen or 100 rate. We are offering two sizes in our Gladioli. The first size, or large bulbs, indicated by letter L in the descriptions are all 1½ inches and up in diameter. The second size, or medium bulbs, indicated by letter M, are all ¾ inches and up in diameter. This latter size will throw satisfactory flower spikes the same summer they are planted and will grow into large bulbs for the next season.

ALICE TIPLADY—Grand, large Primulinus of beautiful orange saffron. L, each 6c; doz., 50c; 100, \$2.25. M, doz., 30c; 100, \$1.50.

AMERICA—Soft lavender pink. Large flowers. Long spikes. L, each 6c; doz., 50c; 100, \$2.50. M, doz., 35c; 100, \$1.60.

ANNA EBERIUS—Dark velvety purple, throat deeper. Fine. L, each 6c; doz., 50c; 100, \$3.00. M, doz., 35c; 100, \$1.75.

BARON J. HULOT—Rich velvety purple-blue. Tall spikes. Extra fine. L, each 8c; doz., 60c; 100, \$3.50. M, doz., 40c; 100, \$2.00.

Rose Ash

GLADIOLI IN MIXTURE

ROKELY'S RAINBOW MIXTURE—This is a special garden collection made up of dozens of the very best varieties mixed. When in full bloom they furnish a veritable riot of colors that will thrill any true flower lover. We are sure you will find our mixture far ahead of most mixtures offered in that it contains no worthless seedlings or old discarded varieties. Price postpaid, **L**, 40c per doz., \$2.25 per 100. **M**, 30c per doz., \$1.50 per 100.

GLADIOLI BULBETS

For those wishing to grow their own bulb—we offer bulbets from our Rainbow Mixture. Under favorable conditions many of these bulbets will throw a flower spike the same summer as planted. They will grow into large bulbs in two summers. We furnish full instructions for planting with each order but give no warranty as to germination. Price, postpaid, 250 Bulbets for 25c; 1250 bulbets for \$1.00.

Lily White

I received plants in good shape. They are the best plants I ever saw and the best packed and arrived in excellent condition. I wish I had got hold of your catalog years ago. I am enclosing another order. Frank Ross, Pt. Huron, Mich.

Souvenir

BERRY PLANT

Price List for 1931

F. O. B. BRIDGMAN, MICHIGAN

We are sure you will find our prices as low as any other firm selling the same high grade stock, and in nine out of ten cases they are lower. We will always meet any competitive prices for the same quality stock, but will not ship out poor stock in order to meet the competition of some firms who have nothing to recommend their stock except low price.

(NOTE: You may select 50 or 75 plants of a variety at the 100 rate and 500 or more of a variety at the thousand rate. Amounts between 100 and 200 of a variety at the 100 rate, between 200 and 300 of a variety at the 200 rate, etc.

All other stock will be shipped collect for transportation charges and you then pay your express agent or mail carrier exact charges upon receipt of shipment.

Field Grown Hardy Perennials

Our list offers Perennials that are best adapted to transplanting and will give you flowers all summer long. Strong field-grown plants ready to bloom the first year.

Columbine

GAILLARDIA (Blanket Flower)—Grows about 2 feet high and flowers from June to frost. Flowers of gorgeous coloring. The center is dark red brown, while the petals are marked with rings of brilliant crimson, orange, and vermilion, the combination all in one flower.

GYPSOPHILA (Baby's Breath)—One of the favorite hardy perennials. Flowers are white, small but produced in great abundance. July to September.

HIBISCUS (Giant Flowering Mallow)—An improved form of the Native Rose Mallow. The most beautiful and hardy of all herbaceous plants. Blooms freely from early July to late September, with striking flowers 6 to 8 inches across. Does well in any location.

PHLOX—This fine old hardy perennial is again fast gaining in popularity, and never fails to arouse admiration, either in small clusters or massed in heavy borders. The profuse flowers remain nearly all summer. We can furnish in Red, White, or Pink. State color.

SHASTA DAISY—Free-flowering plant with large, showy, daisy-like white flowers with gold centers. 3 to 4 inches across. Blooms profusely throughout the summer and autumn.

SWEET WILLIAM—The well-known hardy Sweet William in many colors, blossoming throughout June and July. Flowers are very fragrant. We offer a mixture with wide range of colors.

TRITOMA (Red Hot Poker)—Vies with the Canna for attractiveness and brilliancy. One of the most striking groups of plants in cultivation, with their pyramidal spikes of blazing red, tubular flowers, shading to salmon-rose at edge, and having long protruding anthers. Of easy culture.

PRICES OF PERENNIALS—Tritoma (Red Hot Poker). Each 25c, 3 for 70c, 10, \$2.10; All other perennials listed, Each 20c; 3 for 55c; 10, \$1.50.

ALYSSUM (Dwarf Goldentuft, Madwort)—Broad masses of bright yellow flowers in early spring. An excellent plant for the rocky or front of borders. Of easiest culture and very free blooming.

ASTERS—Perennial Mixed. Unrivalled for their varying forms and bright colors in the perennial border. The wonderful shades of colors lend themselves well for cutting and decorative purposes. Easy to cultivate.

CANTERBERRY BELLS (Campanula)—One of the finest Campanulas, with large bell-shaped flowers, blue, pink, white, rose and mixed colors. Bright and attractive.

COLUMBINE (Aquilegia)—Columbines are always beautiful, but in our long Spurred Hybrids you have a glittering display of highly colored, large, long spurred flowers that are absolutely unequalled. Plants grow two feet high. Flowers come in blues, whites and yellows, and shades of pink and rose.

COREOPSIS (Tickseed)—One of the most showy of hardy plants, with a daisy-like flower, rich, shining yellow. A continuous bloomer. June to September.

Phlox

DIANTHUS (Pinks)—Hybrid Garden Pinks. Without the spicy fragrance of the Hardy Pinks a garden is incomplete. Their perfect form and rich coloring make them great favorites for summer bouquets. June.

DELPHINIUM (Larkspur)—The most beautiful hardy plants in cultivation. They will bloom from spring to fall and their blossoms traverse the whole scale of unrivalled, striking liquid blues. Great uniform spikes of flowers, above a sea of sage-green foliage. Of easiest culture and perfectly hardy.

DIGITALIS (Foxglove)—For stately and picturesque beauty it is not to be surpassed. Various shades, purple to white. Tubular blossoms with spotted throat.

Delphinium

J. N. Rokely & Son, Bridgman, Michigan
